This article has been retracted: please see Elsevier Policy on Article Withdrawal (<https://www.elsevier.com/about/our-business/policies/article-withdrawal>).

This article has been retracted at the request of the Editor-in-Chief.

The authors have plagiarized part of a paper that had already appeared in J. Am. Ceram. Soc., 94 [8] 2420–2428 (2011), DOI: 10.1111/j.1551-2916.2011.04547.x. One of the conditions of submission of a

paper for publication is that authors declare explicitly that their work is original and has not appeared in a publication elsewhere. Re-use of any data should be appropriately cited. As such this article represents a severe abuse of the scientific publishing system. The scientific community takes a very strong view on this matter and apologies are offered to readers of the journal that this was not detected during the submission process.
